

Unified Communications as a Service

SUBSCRIBE TO A UNIFIED WORKSPACE.
SIMPLE. AFFORDABLE. FLEXIBLE.

Quickly give your organization access to current business collaboration tools. Streamline new-hire onboarding, office openings and expansions, and systems alignment from mergers and acquisitions. With a TeleSpaceSM Cloud Service subscription to UCaaS, you don't have to

be a Unified Communications expert. It's easy to deliver a consistent, integrated user experience that speeds business agility, increases uptime, and scales with predictable spend. And if updated phones or video endpoints are desired when connecting to the TeleSpace Cloud Service, we can lease or sell them to you. It's that simple.

*Recognized as one of only a few globally with Cisco's highest certification: **Master Cloud & Managed Service Provider.***

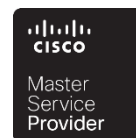

Strength of the Network

TeleSpace Cloud Service subscriptions run on our Quad Core NetworkTM. This world-class network was designed using Cisco[®] architectures and bolstered with fault-tolerant geo-redundancy, dual auto recovery, carrier-neutral access, and state-of-the-art security at each data center. Also unique to TeleSpace and for added security, each customer gets a separate hosted environment inside our cloud network.

Connect remote users securely and inexpensively.

- Voice, messaging, IM, presence
- Desktop and mobile TelePresence
- BYOD (Apple, Android, and more)
- Cisco and other endpoints
- Up to 10 devices per user
