

TelePresence as a Service

SUBSCRIBE TO HIGH-DEFINITION BUSINESS VIDEO.
SIMPLE. AFFORDABLE. FLEXIBLE.

Face-to-face conversation over HD business video is one of the most effective communication tools. Ensuring quick user access, an integrated experience, and predictable spend are entirely possible when that video doesn't require a separate network to install, upgrade or manage.

*Recognized as one of only a few globally with Cisco's highest certification: **Master Cloud & Managed Service Provider.***

These applications (via TeleSpaceSM Cloud Service subscriptions) run on the TeleSpace Quad Core NetworkTM. This world-class network was designed using Cisco[®] architectures and bolstered with fault-tolerant geo-redundancy, dual auto recovery, carrier-neutral access, and state-of-the-art security at each data center. Also unique to Telespace and for added security, each customer gets a separate hosted environment inside our cloud network.

- Cisco and other video endpoints
- BYOD (Apple, Android, and more)
- Conference and immersive rooms
- B2B & multipoint meetings
- Get TPaaS alone or add UCaaS
